Precipitation probability							
40%	60%	60%	40%	30%	30%	20%	20%

Forecast for Tuesday 14 Sep 2021

Weather: Further spells of rain are likely during the early hours of Tuesday morning, these merging to give longer and heavier periods of rain at times. After a wet start to the day, drier periods of weather will develop on Tuesday, albeit still with a risk of occasional showers. Some sunshine should break through at times during the afternoon, with a fine end to the day expected, especially in the west.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 80%

Visibility: Often very poor during the morning at higher levels, with periods of cloud above around 400m. Visibilities will often be good at lower levels, however during periods of rain these will reduce to just a few kilometres. Cloud bases rising to around 700m during the afternoon and becoming more fragmented, although some ragged scraps of cloud are likely to persist on some slopes around 400m.

Meteorologist's View

Low cloud bases during the morning will make for difficult navigation on some of the higher and more featureless terrain. Most routes are likely to be wet underfoot and rock surfaces will be particularly slippery giving hazardous conditions especially on any exposed ridges.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 13 Sep 2021	1.6mm	1.6mm	5.6mm

Forecast for Wednesday 15 Sep 2021

Weather: Low cloud may well become fairly extensive during the early hours and will take a while to lift and break during the morning. Some sunny intervals are likely by late morning with some lengthier sunny periods during the afternoon.

Maximum wind: North-westerly 5-15mph.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 80%

Visibility: Periods of cloud will cover many slopes above 400-500m at first, giving very poor visibilities across much of the area. The cloud will tend to slowly thin and break through the morning to give periods above 600-700m by the afternoon. Visibilities below the cloud will be very good with distant hills and landmarks clearly visible.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 19 Celsius.
At 600m: Plus 14 Celsius.
Freezing level: Well above the summits.
